SKILLS SUMMARY

Languages	: C, C++, Java, Python
Data & ML	: NumPy, Pandas, Matplotlib, Exploratory Data Analysis, Machine Learning Fundamentals, Scikit-learn
Web	: HTML, CSS, JavaScript
Backend & APIs	: Flask, REST APIs, PostgreSQL
Tools/Platforms	: Git, GitHub, VS Code, Jupyter Notebook, Selenium, Jira
Core Concepts	: Data Structures & Algorithms, Object-Oriented Programming, DBMS Fundamentals, Operating Systems, Computer Networks
Soft Skills	: Leadership, Team Collaboration, Adaptability, Continuous Learning

PROJECTS

Telecom Customer Churn Prediction GitHub	Jun 2026 - Jul 2026
- Developed an ML pipeline to predict customers likely to churn in time to intervene and retain them. - Built an end-to-end machine learning pipeline using 7,000+ customer records, covering EDA, preprocessing, feature engineering, and model training. Evaluated with ROC-AUC, precision, recall, F1, and confusion matrix. - Deployed an interactive Streamlit dashboard with SHAP, providing real-time, interpretable churn-risk score for individual customer level. - Tech Stack – Python, Pandas, NumPy, Scikit-learn, XGBoost, SHAP, Streamlit, Joblib	
Spec Key — ML-Based Healthcare Screening Application GitHub	Jan 2026 – Feb 2026
- Engineered a machine learning-based healthcare screening application to identify at-risk patients. - Analyzed the dataset, engineered features, and trained a Random Forest classifier through the full ML workflow from raw data to prediction. - Achieved 97.02% held-out accuracy with 96.55% precision, recall, and F1-score, with a 0.15% train-test gap after removing leakage-prone and low-information features. - Achieved a prediction model that flags at-risk cases, enabling a practical and reusable healthcare-screening approach. - Tech Stack – Python, Pandas, NumPy, Scikit-learn, XGBoost, Tkinter	

TRAINING

Python, Machine Learning & GenAI for Next-Gen Engineers ALX Code Certificate	Jun 2026 - Jul 2026
- Strengthened Python programming and data manipulation using Pandas and NumPy. - Studied fundamental machine-learning concepts including classification, regression, clustering, association, feature extraction and Model evaluation. - Developing knowledge of deep learning, generative AI, prompt engineering, and RAG-based applications.	

CERTIFICATE

Programming in JAVA — iamneo LPU Certificate	May 20, 2026
Data Structures and Algorithms — iamneo LPU Certificate	Jan 15, 2026
Database Management System Part – 1 — Infosys springboard Certificate	Sep 1, 2026
Programming Using C++ — Infosys Springboard Certificate	Aug 21, 2025

ACHIEVEMENTS

- Participated in Code-A-Hunt 2.0, a state-level inter-university hackathon, demonstrating coding and problem-solving skills in a competitive environment. Certificate - Solved 80+ coding problems on LeetCode, strengthening data structures, algorithms, and problem-solving skills. - Applied learned concepts through projects and maintained a GitHub portfolios of implementations.

EDUCATION

Lovely Professional University — B.Tech, Computer Science & Engineering (AI & ML) CGPA: 8.19	Jul 2024 –Present
Him Academy Public School, Hamirpur, Himachal Pradesh — Intermediate Percentage: 87%	Apr 2022 – Mar 2023
M.S.C Senior Secondary School, Sujampur Tira, Himachal Pradesh — Matriculation Percentage: 97%	Apr 2020 – Mar 2021
